---

## KEY PROJECTS

### Planora – AI Travel Planner

- Built an AI-based platform generating personalized travel itineraries based on user preferences and budget
- Integrated Google Maps, safety insights, and emergency assistance features

### Manaco – Task Management & Live Code Collaboration

- Developed a web-based system for task assignment and progress monitoring
- Enabled real-time in-browser code collaboration to improve team productivity

### Healthcare & Wellness Platform

- Designed a full-stack platform for diet tracking, fitness monitoring, and AI chatbot interaction
- Implemented real-time data updates using APIs and React.js

### Website Blocker (Python)

- Built a productivity tool using Python automation to block distracting websites
-

## **ACHIEVEMENTS & CERTIFICATIONS**

- **Runner-Up** – Dry Coder Competition (Mega Final)
  - **Runner-Up** – Hacknomania Hackathon
  - **Contributor** – Google Girl Script Open Source Program (GSSoC)
  - **Data Science Certification** – GeeksforGeeks
- 

## **POSITIONS OF RESPONSIBILITY**

- Class Representative – B.Tech CSE (AI & ML)
  - Team Lead – College Fest Organization
- 

## **SOFT SKILLS**

Problem Solving • Leadership • Adaptability • Critical Thinking • Active Learner
